

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

**Base Year Modification Request Certification**

**Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data**

To request a substitution for a previously approved base-year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

**California Integrated Waste Management Board**  
**Office of Local Assistance**  
**1001 I Street, 9th Floor**  
**PO Box 4025**  
**Sacramento, CA 95812-4025**

**General Instructions:**

Please select the **ONE** choice below that best explains your request to the Board.

1. Use a recent generation-based study to calculate our current reporting-year generation amount, but not officially change our existing Board-approved base year.  
 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected . If you have problems using these sheets, please contact your Office of Local Assistance representative.

**Section I: Jurisdiction Information and Certification**

*All respondents must complete this section*

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

|  |      |                    |          |

**Section II: Information for New Generation-Based Study**

**Attach additional sheets if necessary— reference each response to the appropriate cell number (e.g., 4).**

*Note: New base years must be representative of a jurisdiction's disposal and diversion.*

|   |  |
|---|--|
| 1. Current Board-approved existing base-year: | 2. Proposed new generation-based study year: |
|---|--|

|      |      |
|------|------|
| 1990 | 1999 |
|------|------|

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

Diversion and disposal tonnage is consistent with historical figures. An effort was made to quantify previously unquantified diversion.

**4. Enter your diversion rates below.**

| Diversion rate calculated using existing base year           | a. 46 %                         | Diversion rate calculated using new generation-based study           | b. 59 %                         |
|--|---------------------------------|--|---------------------------------|
| For existing base year pounds/person/day based on generation | 7                               | For new generation based study pounds/person/day based on generation | 12                              |
| Residential generation 34 %                                  | Non-Residential generation 66 % | Residential generation 25 %  | Non-Residential generation 75 % |
| Population existing generation-based study                   | 906000                          | Population new generation-based study                                | 906,000                         |

5. If there is an increase between 4a and 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide examples, e.g. change in jurisdiction's demographics.

An effort was made to quantify previously unquantified diversion from commerical and industrial sources.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

Adjustment factors do not adequately quantify the City's diversion efforts.

|  |             |                 |        |
|--|-------------|-----------------|--------|
| <b>7. Disposal Tonnage: (enter values)</b> | 242899      | 548657          | 791556 |
|  | Residential | Non-Residential | Total  |

Please select the **ONE** choice below that best explains your **disposal** data and complete the required tables.

a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)  
 b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at <http://www.ciwmbo.ca.gov/lgcentral/forms/rytnmdrq.doc>)  
 c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at <http://www.ciwmbo.ca.gov/lgcentral/forms/rytnmdrq.doc>)

**8.** In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. (Note: the Board expects the jurisdictions to be able to provide all back-up documentation, if requested.) Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes [i.e., agricultural wastes, inert solids (e.g. concrete, asphalt, dirt, etc.), white goods, and scrap metal], please identify those programs/waste types and fill out section 11. Note: Restricted waste material should not be extrapolated in non-residential waste audits. Please mark as attachment 8 all copies of survey forms.

\* Please provide detailed non-residential waste audit information in Section 9.

**Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.**

| Diversion Activity   | Actual tons<br>(A) | Estimated or extrapolated tons<br>(B) | Total tons<br>(A+B) | Relative Percent to Total Generation<br>(A+B)/Total Generation | Specific material type(s)<br>(List programs with multiple materials together) | Specific conversion factor used (if any) and Source | Type of record and location of record |

#### 9. Specific Non-Residential Sector Waste Audits – Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from the largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.

(Form will perform all calculations).

Include attachment, marked attachment 9, which includes a summary of all the generators surveyed and all extrapolation calculations used to estimate the diversion rate:

- Include copies of survey form(s) used.
- Include for each generator (use type of generator in lieu of specific generator name, e.g. grocery store) each specific diversion activity and material type (e.g. cardboard recycling) and the associated tonnage for each diversion activity/material type, and applicable conversion factors/source.
- If using number of employees for your extrapolation method, include this information for each generator surveyed.
- Please order the non-residential generators, largest to smallest, based on total diversion tons.
- Also, summary should include the generators that were selected to be surveyed, but did not respond to the survey and the number of employees at each generator.
- As a comparison between disposal from the waste audits and DRS, the disposal for each generator must be included in the summary. Also, you should note if the disposal is being used for the extrapolation calculation. For each non-residential generator, the disposal must be broken out by cubic yard, and roll-off or compactor weights. If disposal was estimated for either disposal-based or employment-base extrapolation methods, please include conversion factor(s) for disposal and source for conversion factor(s). Please provide an explanation as to how the conversion factor(s) is (are) appropriate for your jurisdiction, e.g. study was conducted to determine average weights using hauler weight tickets, etc.

Summarize the non-residential diversion activities for the top 10 generators quantification methodology and applicable conversion factors and sources. (e.g. cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business)

See attachments 3 and 9 for conversion factors.

**10.** On a separate sheet of paper, marked attachment 10, provide the following information for each diversion program listed in section 8 that was extrapolated from representative sampling. (Note: Do not include non-respondents in extrapolation because there is no data from the non-respondents. Extrapolate from survey respondents.)

**A. Describe sampling method including:**

- Type of sampling method (for either stratified or cluster sampling provide detailed information on how strata and clusters were collected.);
- Total number of samples included in the survey;
- Number of non-respondents and respondents;
- Total population;
- Source for identifying population (e.g. city business licenses, commercial database, resident's addresses, etc.);
- Relation of sample size to total population;
- Survey data collection tool(s) and approaches;
- Confidence level and margin of error for the sampled population;
- Outliers (specific generators which fall significantly above or below others) should be removed from base amount prior to extrapolation; and
- Unusual outliers and exceptional anomalies should be described in detail.

**B. Describe the methods used to prevent double-counting between the surveys and the reported tonnages from haulers, recyclers, MRFs and composters.**

**C. Describe extrapolation method including:**

- Basis of extrapolation;
- Why this extrapolation method is appropriate; and
- Sources of information used for extrapolation, such as disposal or employment.
- Include all Calculations.

11. For each restricted waste type [(i.e. agricultural waste, inert solids (e.g. concrete, asphalt, dirt, etc.), scrap metals and white goods (PRC Section 41781.2)) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table:

(Note: program name refers to one specific diversion program for that waste type, for example diversion conducted by City Public Waste Dept.)

| Restricted Waste Type       | Specific Program name           | Year started | Tonnage |
|-----------------------------|---------------------------------|--------------|---------|
| Inert Solids ▼              | City street maintenance         | Post 1990    | 5000    |
| Inert Solids ▼              | City concrete and asphalt       | Post 1990    | 62000   |
| Inert Solids ▼              | City chip seal aggregate        | Post 1990    | 2000    |
| Inert Solids ▼              | Landfill diversion              | Post 1990    | 181797  |
| Inert Solids ▼              | Businesses concrete and asphalt | Post 1990    | 125000  |
| Pull Down for Waste Types ▼ |                                 |              |         |

b. If the diversion program started before January 1, 1990, on a separate sheet, marked attachment 11b, provide the following documentation: (Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 11b for that waste type and program. Instead please provide date of Board approval of previous submitted information.)

(Date)

If documentation is not available, go to 11d.

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion [PRC Sec. 41781.2 (c) (1)].

- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (Note: this criterion is applicable to the entire jurisdiction, not to individual programs [PRC Sec. 41781.2 (c) (2)]). Please include documentation.
- The jurisdiction is implementing, and will continue to implement, the diversion programs in its Source Reduction and Recycling Element.

c. If the diversion program started before January 1, 1990, and the documentation requested in 11b is available (but not yet approved by the Board), complete the table below for each program claimed:

| Restricted Waste Type       | Specific Program Name | New base year or reporting year diversion tonnage |
|-----------------------------|-----------------------|---|
| Pull Down for Waste Types ▼ |                       |   |
| Pull Down for Waste Types ▼ |                       |   |
| Pull Down for Waste Types ▼ |                       |   |
| Pull Down for Waste Types ▼ |                       |   |
| Pull Down for Waste Types ▼ |                       |   |
| Pull Down for Waste Types ▼ |                       |   |

d. If the diversion program started before January 1, 1990, and the documentation requested in 11b is not available, please complete the table below for each program claimed. (*Note: Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.*)

| Restricted Waste Type       | Specific Program name | New base year or reporting year tonnage | 1990 diversion tonnage | Difference |
|-----------------------------|-----------------------|---|------------------------|------------|
| Pull Down for Waste Types ▼ |                       |   |                        |            |
| Pull Down for Waste Types ▼ |                       |   |                        |            |
